Earlier this evening I advertised a number a ham radio items. They have  
all sold. Thank you for all your replies! I only hope our home will  
sell as quickly once we put it on the market.

This seems to be a common problem with ICOM radios. The answer is to open up the radio and turn up the mic gain/deviation. I did this on my 2410 and the audio reports went from "low" to "great".

Sorry but I don't know what control applies on the 229.

I have already typed this three times today. I might as well post it here. :-)

There is a store of mods to ham rigs at garfield.catt.ncsu.edu (152.1.43.23) in the pub/hamradio/HAM-MODS directory. If you have any to add to this collection, please mail them to big@catt.ncsu.edu.

If I'm going to put new finals in a rig, why and how do you neutralize the tubes.

To: ham-equip@ucsd.edu

I bought a used Yaesu YS-60 power/SWR meter. No manual/instructions  
included. Is someone willing to photocopy and send me one? I'll reimburse  
expenses.
